Art Unit: 1712

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4 and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear if a second mineral filler is required by claim 5.

Claim 4 inconsistently allows for 50-99% methacrylic esters, but later limits methacrylic esters to 1-50%. Which is intended?

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over the Obayashi '914 Patent.

Art Unit: 1712

Obayashi exemplifies (#1-5) blends of PC, glass fiber and metablen RK - 200. This appears to be applicant's preferred silicone-acrylate graft (page 15 line 26 of spec).

Claims 1-9 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over the Nodera '443 Patent.

Nodera exemplifies (#5, 6) blends of PC, HIPS, metablen S2001, talc and other additives. Metablen S2001 is one of applicant's preferred silicone-acrylate grafts (page 15 line 24 of spec).

Claims 1-9 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over the JO 9012853 Patent.

The reference exemplifies a blend of PC, titanium dioxide, metablen S2001 and other additives.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over JO 7228764 Patent.

The reference exemplifies blends of PC, talc, metablen S2001 and other additives.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over the WO 00/12629 Patent.

US 6403683 is relied on as a translation. The reference exemplifies (#9, 13) blends of PC, ABS, talc, metablen S2001 and other additives. The ABS has some free (ungrafted) SAN (col. 24 line 36).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Buttner whose telephone number is 703-308-2403. The examiner can normally be reached on Weekdays from 10:00 am to 5:00 pm.
